Broschures

“Thanks to the project **almost half of our demo farmers have now made soil analysis and fertilisation plans,** and the rest are on their way.” Poland

“**Mobile slurry separation has become an innovative success story on Bornholm.** Six farmers have joined forces and through this been able to invest in a mobile solution that both gain economy and lead to reduced losses of nutrients.” Denmark

“Our farmers really got new inspiration from the study tours. **Finnish farmers wanted to learn more about biogas production they saw in Denmark and Poland and structural liming demonstrated in Sweden...**” Finland

“Polish farmers and advisors got new ideas and inspiration in different meetings.

For example reduced tillage aroused great interest due to its positive influence both on production, cost reducing and environmental protection.” Poland

“The Latvian Ministry of Agriculture

is interested in new agri-environmental measures and compensation calculations. They are

looking for detailed information in order to decide, which of the agri-environmental measures should be supported and **the Baltic Deal project offers this information.”** Latvia
